**Subject:** Snowy Hydro launches new website based water resources information service

Snowy Hydro Limited has established a new website based water resources information service. Snowy Hydro has created this service so that the public have access to up to date information on water resources data relating to the Snowy Mountains Scheme.

The new service is based on the Snowy Hydro website at [www.snowyhydro.com.au](http://www.snowyhydro.com.au). It provides up to date information on lake levels, snow depths, Snowy Scheme inflows and releases into local rivers including the volume of environmental releases into the Snowy River from Jindabyne Dam.

Snowy Hydro Limited spokesman, Paul Johnson, said: "Snowy Hydro regards its communications with our various stakeholders and the local community as a high priority. With this in mind, we have now established a web based information service on relevant aspects of our water operations."

"This new service will compliment our existing information services such as lake levels, the monthly water updates and Community Service Announcements that can be accessed from our website at [www.snowyhydro.com.au](http://www.snowyhydro.com.au) "

The new water resources information service and other up to date information on Snowy Hydro can be accessed by visiting our website at [www.snowyhydro.com.au](http://www.snowyhydro.com.au)
