## **Community Service Announcement**

### **Jindabyne Dam Cone Valve Operational Tests**

Over the 3 day period from Wednesday 17<sup>th</sup> October to Friday 19<sup>th</sup> October 2007, Snowy Hydro will be conducting operational tests of our cone valves at Jindabyne Dam.

This will involve a series of short increased water flows from the cone valves into the plunge pool. They will occur randomly and although tests may be consecutive, they will not be continuous over this period.

Local residents may notice the operation of the cone valves and some increased flows over this period. These releases for the cone valve tests will not affect the current monthly release target of water into the Snowy River.

Up to date information on environmental water releases can be found on the Snowy Hydro web page at [www.snowyhydro.com.au](http://www.snowyhydro.com.au)
