Increased Water Flows into the Snowy River

In preparation for future increased releases from Lake Jindabyne into the Snowy River, Snowy Hydro, will be conducting a large scale test of the Jindabyne Dam Water Release Valves, on Monday, 20th September

This test will be from midday until 6pm, and will result in an increase in flows into the Snowy River below Jindabyne Dam.

River levels are expected to rise by around one metre between Jindabyne Dam and Dalgety Weir on Monday 20th and Tuesday 21st September.
