

Notice

Please be advised that diversions from the Mowamba Weir to Jindabyne Dam will recommence on 30 January 2006.

The recommencement of diversions, following the temporary redirection into the Snowy River, is part of the outcome of the Snowy Water Inquiry associated with the corporatisation of the Snowy Mountains Hydro- Electric Scheme.

Riparian flows below the Mowamba Weir will continue, averaging 1.2 ML per day.

All future releases will be into the Snowy River at the Jindabyne Dam.
