

Our proud history

Migrant Snowy Story

People power - building the Snowy Scheme

For the first years of construction, hundreds of workers lived in tents. Over **100,000** men and women from more than **30** countries worked on the Scheme.

More than **100** camps and **8** townships were built to accommodate workers across the Snowy Mountains.

Join the dots and help the workers check their tents for holes, so they keep warm overnight.
