

The Snowy Scheme water cycle

Water cycle

Water cycle fact sheet - [click here](#)

Colour in the water cycle

Find the words and complete the sentence

The water _____ is a continuous _____ that all _____ follows as it _____ around _____ in different states.

Without this process continually happening, there would be no life on Earth.

Find the missing words

_____ is when the sun's rays warm the oceans, lakes, reservoirs, rivers, and the water vapourises (turns to gas).

_____ is when water vapour cools in the sky and forms water droplets.

_____ is when the clouds get too heavy and the snow, hail or rain falls to the ground.

_____ is when water seeps into the ground, filling rivers, reservoirs and lakes.

_____ adds to the runoff when melting snow and rain combine.

Write a sentence about a time that you got caught in the rain
