

2023-24 WATER YEAR SNOWY RIVER DAILY RELEASE TARGETS

Updated - 4 Oct 23

Daily release patterns are notified to Snowy Hydro Ltd from the NSW DPE Water in February of the preceding water year.

Note: Daily targets may be updated by NSW DPE Water at any time. All updates will be uploaded to the Snowy Hydro website as they occur.

Days highlighted in yellow include an 8 hour high flow event. This means that for 8 hours on these days, flows from the dam will be significantly higher than the daily target. The peak values for the days highlighted in yellow are shown on the right.

* Note: NSW DPE Water has instructed that only one of the 8 hr peak flows 1 or 5 will occur and only if reservoir levels allow. If no 8 hr peak occurs on one or either day, then the flow on that date will be 5000 ML/d. The high flow occurred on May 18, therefore Oct 18 will be 5000 ML/d with no 8 hr peak

1. 18/05/23 8864 ML/d (102.6 m3s-1)*
2. 21/06/23 4507 ML/d (52.2 m3s-1)
3. 22/08/23 5000 ML/d (57.9 m3s-1)
4. 20/09/23 4699 ML/d (54.4 m3s-1)
5. 18/10/23 10362 ML/d (119.9 m3s-1)*
6. 10/11/23 4236 ML/d (49.0 m3s-1)

NSW DPE Water will be managing the community notification process around high flow releases. If you are a landholder we strongly suggest you contact NSW DPE Water on the details provided below to discuss what the high flows will mean to river levels at your property.

If you have any questions regarding the daily release arrangements contact NSW DPE Water at www.industry.nsw.gov.au/contact-us-email
