

Community Insights Campaign 2024

About Snowy Hydro

For 75 years, Snowy Hydro has played an important role in Australia's energy landscape, leading the way in the transition to a renewable energy future. Throughout its proud history, Snowy Hydro has remained committed to supporting the communities where the Snowy Scheme operates.

About the Snowy 2.0 project

Snowy 2.0 is the next chapter in the Snowy Scheme's history. It is a nation-building renewable energy project that will provide on-demand energy and large-scale storage for many generations to come. It is the largest renewable energy project under construction in Australia.

What is the Community Insights Campaign?

Snowy Hydro is hosting a community insights campaign to better understand the impacts of the Snowy 2.0 project on our local communities. The results of the campaign will assist with preparing and informing Snowy Hydro's social impact strategy.

What are our aims?

Understand **how you feel** about Snowy Hydro and the Snowy 2.0 project in 2024

Gather insights on how we can **enhance our role within the community**

Help shape the next **75 years** of Snowy Hydro

The campaign will run **until early May 2024.**

Participation is open to those over 18 years of age and who reside in the Snowy Mountains and surrounding regions.

The online survey will ask **33 questions in four categories and take approximately 12 minutes to complete.**

Those who complete the survey will be entered into a draw to **win a trip to visit Lobs Hole**, one of the Snowy 2.0 project sites.

To ensure transparency, the campaign is being conducted by a third party organisation, Struber, on Snowy Hydro's behalf.

Why is Snowy Hydro undertaking this campaign?

Snowy Hydro has commissioned a community insights campaign to better understand the social impacts of the Snowy 2.0 project and inform our social impact strategy.

The online survey will gather local views from those who reside across the Snowy Mountains and beyond. The survey asks about your personal experiences and opinions regarding the impacts of the Snowy 2.0 project on the community and the regions – both positive and negative. We also want to know how you would like to see Snowy Hydro support these impacts and what you think is most important.

We will enhance our community support by better understanding how our local community members view Snowy Hydro, the Snowy 2.0 project, and our work.
