

Introduction to Snowy Hydro I Spy

Science
Activity 7

Overview

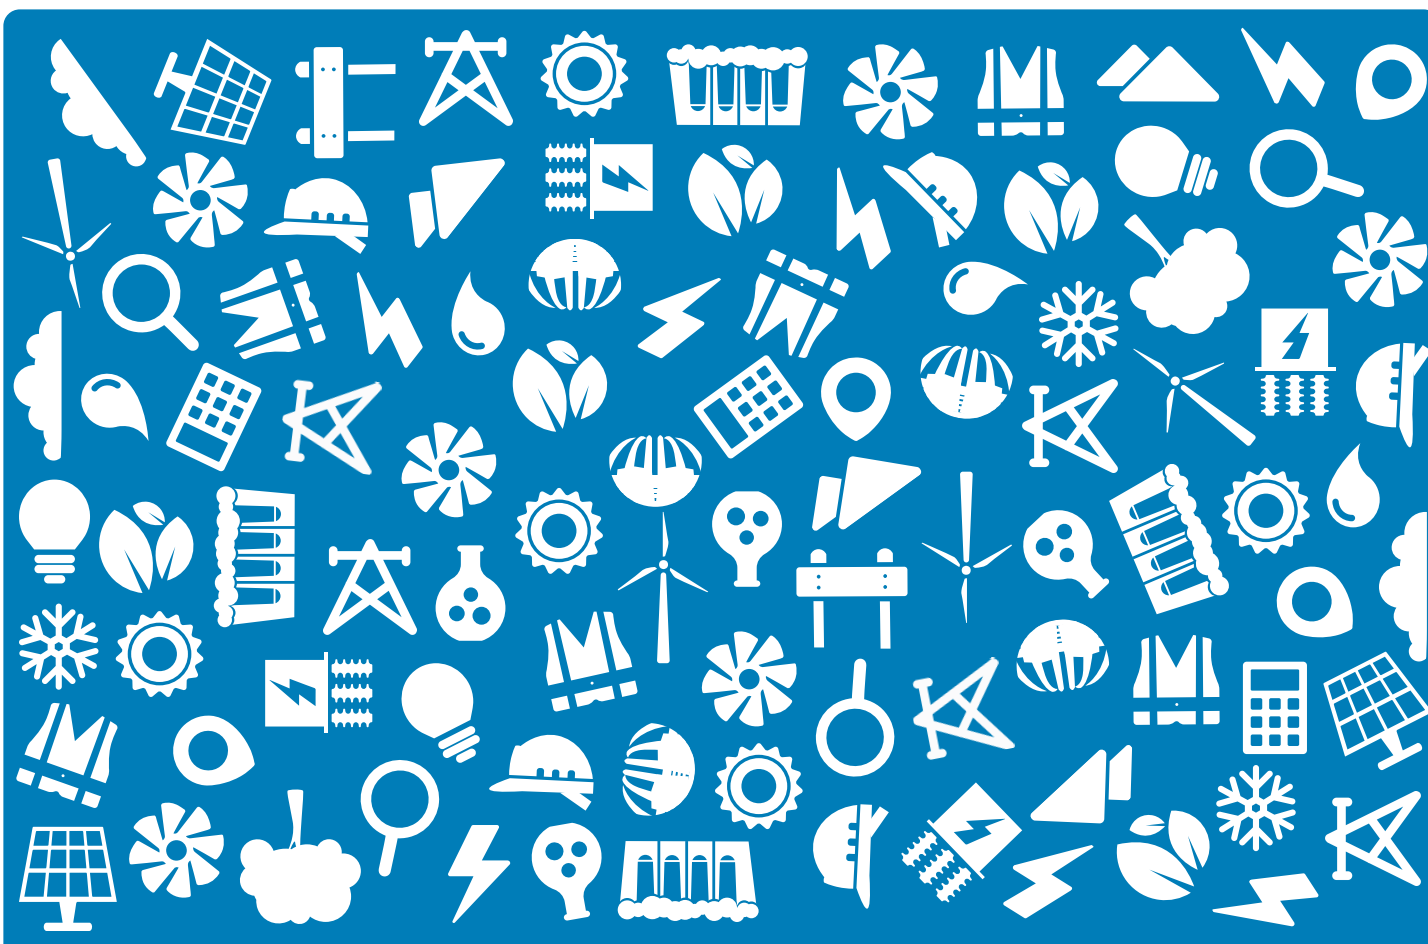

Construction of the Snowy Scheme took 25 years from 1949 to 1974. An incredible engineering feat, this complex interconnected hydro-electric scheme uses the power of water to generate clean, renewable energy.

Instructions

Spot each of the icons in the box below. Find the number of icons listed and colour each in as they are found.

Hint - choose a different colour for each icon set
