

The Snowy Scheme water cycle

Journey of a water drop

Instructions

Write a story about the journey of your water drop. Be as imaginative and creative as you like. Are you the water drop, or are you watching the journey? Think about water in the Snowy Hydro Scheme and the water cycle. How can you apply what I have learned about these two ideas to your water drop's journey?

Inspiration

Maybe your story starts in a reservoir or as a rain drop falling to earth. Or maybe the water drop is gushing through a tunnel, or snow melt has begun, producing your water drop. Maybe a kangaroo has just taken a drink and swallowed the water drop! Or maybe you would like to start your story in a washing machine. Ideas are endless... give yourself time to think and plan.

Plan, draft, edit and publish

Below is a space for you to plan your story. You may choose to use a mind map, or list your ideas. It doesn't really matter! You are the audience for planning. There is also a space for you to write (draft) your story on the other side of this sheet.

Plan your ideas below

Write

Title _____

Draw your droplets journey
