

Tracing and word frames

This number and writing activity is fun for younger children to explore the Snowy Scheme and learn about renewable energy through practicing their tracing skills.

Snowy Hydro

water
dam

renewable
power station

energy
turbines

aqueducts
tunnel

Through an interconnected tunnel system, the power of water generates hydro-electricity, supplying homes and businesses with clean, renewable energy

km = kilometres

Snowy Hydro by numbers

Trace around the dotted line and colour in the words

9 power
stations

16 dams 33 turbines

80 km
of aqueducts

145 km
of tunnels
