2025 LOCAL SCHOOL STEM FUND OVERVIEW

At Snowy Hydro, we are committed to shaping the future of STEM (science, technology, engineering and maths) education in Australia by empowering young minds with the skills and confidence they need for the careers of tomorrow.

We deliver on this promise by partnering with regional schools and investing in local STEM education through our Local School STEM Fund.

Through our third annual Local School STEM Fund, Snowy Hydro has provided a total of \$251k to 35 schools in 17 locations across the Snowy Mountains and Cessnock regions of NSW.

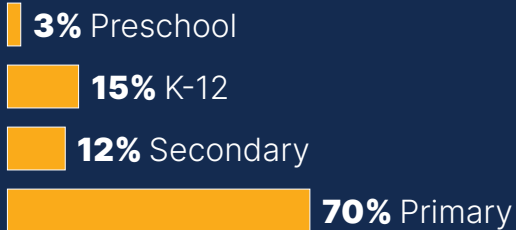

SHAPING THE FUTURE OF STEM TOGETHER

Snowy Hydro established the Local School STEM Fund to help shape the future of STEM education in Australia and bridge the gap between education and industry.

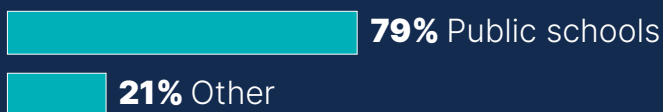

Through hands-on experiences and real-world connections, the fund brings STEM to life in local classrooms, sparking curiosity, building practical skills and opening doors to future careers in the energy transition and beyond.

In partnership with Snowy Hydro, students will be able to see the value of STEM in their lives and connect what they're learning today with the opportunities of tomorrow.

LIST OF SUCCESSFUL SCHOOLS

By supporting hands-on, future-focused programs like the region's first school-led drone course, VEX robotics kits that connect regional students to national opportunities, and even an astronomy club, these initiatives bring STEM to life in meaningful ways.

These activities build technical skills while encouraging curiosity, problem-solving and deeper engagement among a diverse range of students.

Cessnock LGA

- Kitchener Public School
