

2025-26 WATER YEAR SNOWY RIVER DAILY RELEASE TARGETS

Updated - 9 Jul 25

Daily release patterns are notified to Snowy Hydro Ltd from the NSW DCCEEW in February of the preceding water year.

Note: Daily targets and high flow volumes may be updated by NSW DCCEEW at any time. All updates will be uploaded to the Snowy Hydro website as they occur.

Days highlighted in yellow include an 8 hour high flow event. This means that for 8 hours on these days, flows from the dam will be significantly higher than the daily target. The peak values for the days highlighted in yellow are shown on the right.

* Note for #4: If the reservoir level allows, NSW DCCEEW has requested an 8hr peak release of 9000 ML/d. The reservoir level will be assessed prior to the event and if it is not possible, then a release of 5000 ML/d will be made over a 24 hour period. Final volumes will be determined closer to the date and this document will be updated if required.

1. 28/08/25 2400 ML/d (28 m3s-1)
2. 17/09/25 3000 ML/d (35 m3s-1)
3. 02/10/25 4500 ML/d (52 m3s-1)
4. 15/10/25 9000 ML/d (104 m3s-1)*
5. 06/11/25 2400 ML/d (28 m3s-1)

Calendar of Snowy River Daily Release Targets - Low Flows and Peak Releases in ML

NSW DCCEEW will be managing the community notification process around high flow releases. If you are a landholder we strongly suggest you contact NSW DCCEEW on the details provided below to discuss what the high flows will mean to river levels at your property.

If you have any questions regarding the daily release arrangements contact NSW DCCEEW at www.industry.nsw.gov.au/contact-us-email
