

Hunter Power Project Complaints Register - 1 September 2026

Tr ID	Date	Time	Nature of Complaint	Description	Response
001	06/05/2025	09:02	Noise	- Complaint received via Community Hotline. - The stakeholder (SH) reported a noise disturbance the previous night for approximately 30 minutes. - SH described the sound as similar to the crashing noise of heavy objects being dropped. - SH also reported that they had experienced a similar sound on several other occasions (dates unknown).	- HPP Communication and Stakeholder Engagement Manager (CSEM) received the initial call. - CSEM confirmed she would refer the issue to the construction team to identify any potential causes of the noise and update SH. - CSEM updated SH on her progress with the construction team at 11:38 on 6/5/25. - CSEM and the construction team identified a potential source of the noise, however, they could not conclude it was the definitive source. The team implemented mitigation measures as a precaution. CSEM updated the stakeholder 16:55 on 6/5/25. - Noise monitoring was administered at various points throughout the night to ensure mitigation measures were effective. It was noted by the team that a nearby warehouse was also producing noise at this time. - CSEM is continuing to work with SH.
002	08/07/2025	14:14	Smoke & Odour	- Complaint received by Snowy Reception. - The stakeholder (SH) in Heddon Greta reported an acrid smell when she went outside to put her rubbish out. - SH described having stinging eyes and nausea from the odour.	- SHL Reception Cooma received the initial call and emailed details to HPP Communication and Stakeholder Engagement Manager (CSEM) at 2:14 pm. - CSEM and HPP Environment Manager (EM) called SH back at 2:58 pm. - EM explained to SH that the smoke and odour being experienced were a normal part of the process of commissioning the power station and that the impacts would subside over the coming week.
003	08/07/2025	15:17	Smoke & Odour	- Complaint received via Community Hotline. - The stakeholder (SH) in Sawyers Gully reported experiencing smoke and odour at their premises.	- HPP Environment Manager received the initial call at 3:17 pm. - EM explained to SH that the smoke and odour being experienced were a normal part of the process of commissioning the power station and that the impacts would subside over the coming week.
004	08/07/2025	15:55	Smoke	- Complaint received by Snowy Reception. - The stakeholder (SH) in Buchanan reported experiencing smoke at their premises which was affecting her asthma.	- SHL Reception Cooma received the initial call and emailed details to SHL Manager - Environment and Lands at 3:55 pm who forwarded the email to at 2:14 pm. - HPP Environment Manager (EM) called SH back at 2:58 pm. - EM explained to SH that the smoke and odour being experienced were a normal part of the process of commissioning the power station and that the impacts would subside over the coming week.
005	08/07/2025	17:06	Odour	- Complaint received by Community Hotline. - The stakeholder (SH) in West Wallsend reported a diesel odour at their premises.	- HPP Environment Manager received the initial call at 5:06 pm. - EM explained to SH that the smoke and odour being experienced were a normal part of the process of commissioning the power station and that the impacts would subside over the coming week.
